# Disclaimer

By attending this presentation including the commentary by the Company management and the transcript of the same, together (“Presentation”) and/or accepting a copy of it, you agree to be bound by the foregoing limitations and conditions:

This Presentation is prepared by Tracxn Technologies Limited (“Company”) solely for information purposes and does not constitute an offer, solicitation, recommendation, or invitation to purchase or subscribe for any securities and shall not form the basis of or be relied on in connection with any contract or binding commitment whatsoever. This Presentation does not consider, nor does it provide any tax, legal, or investment advice or opinion regarding the specific investment objectives or financial situation of any person. This Presentation may not be copied, reproduced, summarised, disseminated, or redistributed to any other person in any manner whatsoever without the Company’s prior consent in each instance. This Presentation has not been and will not be reviewed or approved by any regulatory authority or by any stock exchange in India. No rights or obligations of whatsoever nature are created or shall be deemed to be created by the contents of this Presentation.

The Company, its affiliates, shareholders, directors, employees, or advisors do not make any representation or warranty, expressed or implied, and no undue reliance should be placed on the accuracy, fairness, or completeness of the information contained in this Presentation. The Company, nor any of its advisers or representatives accepts any liability whatsoever for any actual or consequential loss or damages howsoever arising from the provision or use of any information contained in this Presentation. The information contained in this Presentation should be considered in the context of the situations prevailing at the time when the Presentation was made and are to be read in conjunction with the company’s financial results, uploaded on the Stock Exchanges where the Company is listed. The Company expressly disclaims any obligation or undertaking to supplement, publicly amend or disseminate any updates or revisions to any information/statement contained in the Presentation to reflect any change in events, conditions, or circumstances including economic, regulatory, market, and other developments on which any such information is based.

This Presentation may contain, words or phrases that are forward-looking statements that involve risks and uncertainties and are based on certain beliefs, plans, and expectations of the Company. Although the Company believes that such forward-looking statements are based on reasonable assumptions, it can give no assurance that such expectations will be met. Actual future performance, outcomes, and results may differ materially from those expressed in forward-looking statements because of several risks, uncertainties including but not limited to our ability to implement our strategy successfully, the market acceptance of and demand for our offering, technological changes, volatility in global capital markets, pandemic and international and domestic events having a bearing on the Company’s business. You must not place undue reliance on these forward-looking statements, which are based on the current views of the Company’s management.

The operating metrics reported in this Presentation are calculated using internal Company data based on the operational activities. While these numbers are based on what the Company believes to be reasonable estimates for the applicable period of measurement, there are inherent challenges in measuring across some operational metrics. The methodologies used to measure these metrics require considerable judgment and are also susceptible to an algorithm or other technical errors. The Company systematically reviews its processes for calculating these metrics from time to time and may discover inaccuracies in the metrics or may make adjustments to improve their accuracy, which can result in adjustments to previously disclosed metrics. In addition, the Company metrics may differ from estimates published by third parties due to differences in methodology.

To facilitate understanding, some non-GAAP metrics are used and financial amounts are converted from ₹ Lakhs into ₹ Crores for this Presentation hence, there could be some totalling anomalies in the numbers.

# Significant cost advantages from India-based operations

Significant cost advantage due to **make-in-India**. Especially:

- **Data-production & technology platform** is built from India
- **Global sales** happens from India (sales & support teams work across all time zones)
- Very efficient content-driven **customer acquisition flywheel**

These give us a significant and long-lasting cost advantage

### UAE Tech startups continue to see downward trend; Funding falls 49% in Q3 2023

Tracxn Geo Quarterly Report: UAE Tech - Q3 2023

Press Release

October 4, 2023

- Total funding into UAE Tech startups dropped 49% to \$112 million in Q3 2023, compared with \$219 million in Q3 2022
- No IPOs took place, and no Unicorns emerged in Q3 2023
- Number of acquisitions dip to four in Q3 2023 from 10 in Q3 2022
- FinTech, Enterprise Applications and HealthTech were the top-performing segments
- Dubai takes the lead in terms of total funding in Q3 2023

**UAE:** Tracxn, a leading global SaaS-based market intelligence platform, has released its Geo Quarterly Report: UAE Tech - Q3 2023. The report, based on Tracxn's extensive database, provides insights into the UAE Tech space.

The UAE Tech space is the second highest-funded sector in the Middle East and North Africa (MENA) region, followed by Saudi Arabia and Egypt. Funding in this space saw a peak in 2021 after which it has

### Funding galore in spacetech start-ups; \$62 mn infused this year

**UMA KANNAN** @Bengaluru  
FROM just \$35 million funds raised between 2010 and 2019, the Indian spacetech sector has already attracted \$62 million in funding so far this year, which is a 60% increase as compared to the same period last year. According to recent insights by Tracxn, India ranks seventh in terms of funding within the international spacetech landscape for the year. In 2020, the sector secured \$28 million in funding and it was \$86 million in 2021. In 2022, the sector witnessed an impressive \$112 million funding. As per experts, after the launch of Chandrayaan-3 mission, venture capital funding and the number of start-ups in this space might increase in the coming years. "The success of Chan-

drayaan-3 is sparking a significant rush of interest among both VCs and start-ups in the space sector. VCs are known for seeking high-potential opportunities and will likely view the space sector as a burgeoning field with substantial growth potential. This will increase funding for these start-ups as investors recognise the viability of innovative projects and solutions related to satellite technology, space research, and interplanetary exploration." Somdutta Singh, founder & CEO, Assidius Global Inc. LP Investor in several marquee funds, said. Awaiz Ahmed, CEO, Pixxel had told this newspaper that ever since the Indian government introduced new space reform initiatives, their support in enabling private companies

to address the gaps has only grown further. Pixxel has so far raised \$97.10 million in funding, followed by Skyroot at \$72.3 million and Agnikul has raised \$34.8 million. Tracxn said in its report that among the thriving business models within the sector, small payload-based launch vehicles have garnered significant attention, securing \$75.6 million in funding over the last two years. Satellite-based Imaging Solutions have also witnessed substantial support, with \$94.2 million in funding secured over the past two years. As per reports, there are at least 140 registered spacetech start-ups in the country. Singh added that over the past few years, funding in Indian space tech start-ups has experienced significant growth.

### Startup funding dips to lowest in 5 yrs in Q3 to \$1.5 bn, says report

ARYAMAN GUPTA  
New Delhi, 27 September

Funding among Indian startups declined to the lowest in five years in the third quarter of calendar year 2023. Investments fell 54 per cent compared to the same period last year at \$1.5 billion. On a sequential basis, funding fell 29 per cent from the previous quarter, according to a report by market intelligence platform Tracxn.

"Despite facing the challenges of a funding winter, India ranks as the fifth highest funded country in Q3 2023 and maintains its fourth-place position in terms of total funding for the year to date (YTD). It underscores the resilience of India's tech startups and their ability to adapt to changing market conditions," said Neha Singh, co-founder, Tracxn. The quarter saw five funding rounds cross the \$100 million mark, including the likes of Perfios, Zepto, Ola Electric, Ather Energy and Zyber 365. "Despite the decline in funding, India remains among the top-performing tech ecosystems globally. A promising sign in the report is the month-on-month funding growth, with an impressive 91% increase from \$376 million in August 2023 to \$720 million in September 2023," said Abhishek Goyal, co-founder, Tracxn.

### FUNDING IN FINTECH STARTUPS IN THE US ACCOUNTED FOR 58% OF TOTAL CAPITAL RAISED GLOBALLY

FinTech News | 23.07.2023 | 04:30 pm

Tracxn, a leading global SaaS-based market intelligence platform, has released its FinTech - US Semi-Annual Funding Report - H1 2023. The report, which is based on Tracxn's extensive database, provides insights into the US FinTech space.

Funding into US-based FinTech startups fell in H1 2023 fell 33% when compared with H1 2022, but rose 42% from H2 2022. The US FinTech space attracted investments worth \$12.8 billion in H1 2023, which is 58% of the total funds raised by the global FinTech startup ecosystem during the same period.

Despite facing challenges during H1 2023, the US-based FinTech startups have displayed remarkable perseverance. While funding experienced a 33% dip compared with H1 2022, it rebounded with a 42% surge from H2 2022. During H1 2023, the US FinTech sector managed to attract significant investments amounting to a staggering \$12.8 billion, representing for 58% of the total funds raised by the global FinTech startup ecosystem during the same period.

### INDIAN START-UPS RAISE MORE FUNDS THAN CHINA FOR 2ND STRAIGHT YEAR

India pulled ahead of China in terms of start-up funding for a second consecutive year during the first half (H1) of 2023, raising \$5.5 billion. It attracted the third-highest start-up funding. The US topped the list, raising \$67.4 billion, followed by the UK, which raised \$8.6 billion, according to data from market intelligence platform Tracxn. The last time China got more start-up funding than India was in H1 2021.
